

HOME IMPROVEMENT ROI

# Cut Your Energy Bills by Upgrading Your Roofing, Windows or Siding

Energy prices increase at an average of **5% per year**. If your energy bill is **\$200/month** today, here's what you're projected to spend and how much you could potentially save by upgrading:

**10 YEARS**  
ENERGY COSTS

**\$30,187**  
\*(WITH INFLATION)

**30 YEARS**  
ENERGY COSTS

**\$159,451**  
\*(WITH INFLATION)

## Roofing

An energy-efficient roof reflects heat and locks in comfort, cutting heating and cooling costs by 10% or more every year.

**10% Energy Costs Savings**

10 Year Savings

**\$3,018**

30 Year Savings

**\$15,945**

## Insulated Siding

Insulated siding wraps your home in a thermal blanket to help maintain indoor temps, cutting energy use by as much as 20% or more.

**20% Energy Costs Savings**

10 Year Savings

**\$6,037**

30 Year Savings

**\$31,890**

## Energy-Efficient Windows
